

Kabel BW implements Digital Personnel File within 5 Days

Out-of-the-box software IQAkte Personal from IQDoQ is the smart alternative to individual software development projects

Bad Vilbel, Germany, June 21, 2011 – IQDoQ, a leading provider of document management solutions, announces the successful kick-off of its digital personnel file solution at the German cable network provider Kabel BW. With its decision for IQAkte Personal the company employing over 700 employees opted for an out-of-the-box solution in contrast to an individual software development project. Here the short implementation time of the system was the main decisive factor: In only 5 days IQDoQ was able to adapt its solution according to the client requirements, install it in collaboration with the IT department of the client, and to train human resource staff in using the software. Already in the training the first existing files have been captured, and the human resource team was able to work efficiently with the digital personnel file. Since May the solution runs in complete production mode.

“Right at the start we had doubts whether the presorting of the about 850 existing files for digitization would consume more time as we are able to save with a digital personnel file,” states Manuela Burzynski, manager of Entgelt & HR Systeme at Kabel BW, who was in charge of the implementation. “When we realized that we could scan the files completely and are then able to electronically perform a separation in register and individual documents, we intensified our search for a solution.” However, she has abandoned the other option to develop an individual solution due to her long-term project experience: “Of course our IT would have preferred to have everything in one single source based on our existing document management system, but this would have become a lengthy project where a lot of things could have gone wrong.”

When evaluating the solutions available in the market, IQAkte Personal of IQDoQ became the favorite. Especially in terms of its intuitive usability, the most important client requirement, the standard software was able to score. Here the visual application component DoQFlow contributed a lot, providing an enhanced 3D view of documents including a browsing feature. Looking

back Manuela Burzynski states with a smile that she had considered the statement that the solution can be implemented within 5 days as a marketing gag. Thus she was pleased and surprised that IQDoQ presented already at the workshop an application comprising all customization requests which have been stated in advance, and which in the following required only some minimum changes.

When installing the digital personnel file IQDoQ imported the employee master data from the SAP ERP and created the required roles and privileges. The subsequent user training completed the introduction. Kabel BW charged an external service provider to scan the existing files, and two weeks later the complete digital version was available. Since then the documents are aggregated in a register with an effective date: IQAkte Personal has proven itself as being so clearly arranged that the document separation which has originally been planned was abandoned.

For Manuela Burzynski the rapid implementation has also paid off very quickly: "Now we have archived all documents in an audit-proof way, and they are available at our three sites." In addition, the direct electronic data exchange with payroll service providers helps to save postage and the time required for copying. "However, most of the time we have saved by successfully beating the administration monster", she states.

Webinar about the project at DATAKONTEXT:

Title: "Einführung einer digitalen Personalakte – Schnell implementierte Standardlösung oder individuell ausgeschrieben IT-Projekt?" ("Introducing a digital personnel file – rapidly implemented standard solution or individual development project?")

Speakers: Jochem Brost, Business Development Manager, IQDoQ GmbH;
Manuela Burzynski, Expert Entgelt & HR Systeme, Kabel Baden-Württemberg GmbH

Date: June 28, 2011, 3.00 to 4.00 P.M.

About IQDoQ

IQDoQ (www.IQDoQ.de) is the document management software specialist subsidiary of the MATERNA Group. For more than 25 years IQDoQ develops digital files solutions for process optimization based on the document management system HyperDoc and the output management system FormText. The business unit IQAkten embraces vast know-how from about 1,000 projects dealing with customizable and cost-efficient out-of-the-box solutions for dedicated tasks, e. g. the digital personnel file IQAkte Personal.

Over 10,000 users in large companies like the DAK, the Deutsche Paket Dienst, trans-o-flex, the Spar Handels GmbH, Le Meridien, the Deutsche Post, the vineyard Gerhardt as well as the Klaus Faber AG with their employees and clients rely on the IQDoQ solutions for efficient document management.

About Kabel BW

Kabel BW is the innovative provider of fast internet, telephone and TV services (Triple Play) with high growth rates in Baden-Württemberg. With 2,4 million clients, Kabel BW is currently one of the largest European cable network providers being present in every second household in Baden-Württemberg. Kabel BW offers attractive packages with an excellent price/performance ratio and very high internet bandwidths (up to 100 MBit/s) and telephone flat rates. Due to a large-scale network upgrade 99% of the 3.6 million households with cable access in Baden-Württemberg are able to leverage the ‚CleverKabel‘ offerings. In the enhanced cable network over 5 GBit/s (5000 MBit/s) for internet, telephone and TV are available to every household. Currently clients of BW are able to choose among 400 TV programs (also 30 HDTV senders) and 150 broadcasting channels. In addition, Kabel BW offers its own video-on-demand services under the name ‚Kabel BW Videothek‘.
