

## Hospital Porz am Rhein Implements Digital Personnel File IQAkte Personal from IQDoQ

### Deal signed at the Zukunft Personal 2011 trade show drives transition to advanced administration

*Bad Vilbel, December 6, 2011 – IQDoQ has won the hospital Porz am Rhein as new client for its digital personnel file IQAkte Personal. As the document management software specialist, a subsidiary of the MATERNA Group, today announced, a respective agreement has already been signed at the trade show Zukunft Personal 2011 in Cologne, Germany in September. Powered by IQAkte Personal the hospital comprising 440 beds strives to enhance its human resources processes and to implement audit-proof archiving. The project has been launched in October with a five day kick-off phase “5Days2Go“, productive operation has started in November.*

“In addition to the fair and comprehensible pricing model, especially the complete product implementation in only five days has convinced us“, explains Mario Schiffer, Human Resources Manager, Hospital Porz am Rhein. “No other vendor was able to ensure this. However, we didn’t need to make any compromise: The solution is perfectly tailored to our requirements, and it enables the centralized administration and representation of any employee documents from hiring to resignation. With this and by supporting our scheduling administration, contracting, and email communication we have taken another great step on our way towards an advanced administration.“

In addition to the HR team with five people, the data security official, members of the IT department and the workers council took part in the product implementation. Thus all major questions could be immediately answered and dispel any doubts which might still be existing. Subsequently IQDoQ implemented the agreed adaptations of the software configuration and concurrently integrated the human resources management software Kidicap during “5Days2Go“. Also, a scan workstation has been setup and the prerequisites have been established to enable the employees to digitize their 850 existing files by themselves until the end of the year. On this occasion the files shall be checked for any legacy information which can be removed.

"Our pragmatic approach accompanied by a short introduction time frame has once again proven its worth at the hospital Porz am Rhein", states Frank Rüttger, Manager of the business area IQAkten. "Together with a highly motivated team which is 100% backing the solution, the next steps become so much easier." Thus in the digital HR office a digital pay slip and the integration of the web client in the employee portal are also planned as well as the electronic management of documents across the employees like project documentation and company agreements.
